Azeus Convene - Panel Sponsor

We have been working on software engineering projects since 1990 and over the past 27 years Azeus Systems has delivered more than 200 successful solutions for our clients. We have grown from a small company to a public listed company with more than 300 employees and offices around the world.

As a global company with offices on five continents we are well placed to know that something is not right with the weather on our planet, so we decided to do our bit and improve our sustainability by going for an ISO 14001 accreditation. By going through this process we were surprised by the amount of paper we were using for meetings.

So we built Convene.
