Kahootz - Panel Sponsor

Effective team-working requires much more than simple file-sharing - which is why as a functionally-rich and adaptable cloud collaboration service Kahootz is now empowering public sector staff to innovate and transform the way they work with colleagues and external stakeholder organisations. Kahootz secure online workspaces can be configured to support document management, stakeholder consultation, supplier deal rooms, policy development, project management, multi-agency working and much, much more.

Kahootz is used by organisations, such as the Cabinet Office, Ministry of Justice, NHS England, Department of Health & Social Care and Havant Borough Council and is the only service of its type to be accredited to store and share (OFFICIAL-SENSITIVE) information by the Ministry of Defence.
